

1. Write a Python program to concatenate all elements in a list into a string and return it

```
In [2]: def concatenate_list_data(list):  
        result= ''  
        for element in list:  
            result += str(element)  
        return result  
        print(concatenate_list_data(["F", "O!"]))
```

F0!

```
In [ ]:
```
